

This is a scenery installer for an SDG Scenery

#### HOW TO INSTALL

- 1- Unzip the EXE file in the ZIP archive in a path of your choice
- 2- Run the EXE
- 3- Make sure your PC is connected to the Internet for the installation process to succeed
- 4- The EXE installer will ask you for the license key and the email address you received via email during purchase of this product
- 5- The application should prompt you when the installation is complete
- 6- Enjoy the realism.

NOTE: if the installer fails to find the Flight Simulator path in the registry, please edit the supplied "FSPath.ini" file and write the path of the MS Flight Simulator on your hard drive instead of the supplied example path. Then save the INI file and restart installer.

#### HOW TO UNINSTALL

You need to uninstall the scenery manually (Only for FSX Version)

- 1- Start Microsoft Flight Simulator X
- 2- In the main menu click on "SETTINGS", under "Other Settings" click on "Scenery Library"
- 3- Select "HESH X" and click on "Delete Area"
